

Features

- Mounting package to mount between studs
- Residential Local Area Network (RLAN) support
- Simultaneous Internet access for multiple users
- Internet security firewall
- File server-digital music and photo storage
- Controllable from any PC on the RLAN
- UPB home automation controller
- Family Lifestyle applications—calendar, recipe manager, and more

Benefits of a Residential Local Area Network (RLAN)

- Simultaneous Internet access
- Share files, programs, printers, scanners, external storage devices, and disk drives
- Transfer files
- Archive and back-up files
- Head-to-head gaming

Applications

- Home automation—control lights and appliances manually, automatically, by timer, or based upon an external event
- Camera monitoring—locally monitor the nursery, the back patio, etc. or monitor remotely over the Internet
- Intranet applications—family calendars, address book, grocery list, and more

NetPlace is an integrated computer networking and home automation controller for the residential or small business marketplace. It is a highly-flexible computer server that is a convenient and affordable communication/system manager for the home, home office or small business.

NetPlace is a flexible and dedicated computer system that provides networking, network applications and simultaneous Internet access in one integrated server package.

The Model 106 NetPlace server comes in an extremely compact package that allows for mounting between studs, thereby providing compatibility for any brand of structured wiring system on the market. The Model 106 allows the user to easily implement a home network while at the same time have a UPB automation controller for controlling lights and appliances.

The Model 106 NetPlace server is an extremely powerful UPB powerline carrier automation controller. Control lights and appliances manually or automatically based upon time of day or, in conjunction with other devices, in scenes. For example, one could setup a “scene” or “macro” that would turn off the family room lights, turn on a gas fireplace, and then turn on the television and DVD player to watch a movie.

NetPlace 106 Home Server

NetPlace's Family Lifestyle applications allow the busy family to manage their lives using easily accessible applications such as a calendar, recipe manager, car maintenance logs, personal inventory manager, and an address book.

Simultaneous Internet access allows multiple users to access the Web using a single Internet Service Provider account, whether it is dial-up, cable modem, DSL or wireless service.

An Internet security firewall safeguards the entire network to prevent unauthorized access from external sources over the Internet.

Installation

NetPlace™ 106 is designed for easy mounting between studs. It requires a 110V AC outlet and is easily connected using a network hub and Category 5 cables.

Specifications

Model Name	NetPlace™
Model Number	106
Case	Packaging allows for mounting between studs
Dimensions	3.25"D X 12"W X 8.5"H
Net Weight	8.3 lb.
Operating System	Linux®
Input Voltage	120V AC +/- 10%, 60 Hz
Hard Drive	40GB capacity minimum (optional upgrades to 300 GB)
Memory	128 MB (minimum—optional upgrades)
Network Interfaces (LAN / WAN)	Two - 10/100BaseT
Standard Applications	UPB home automation and control Multimedia—digital music and photo storage Router—NAT router and firewall (static and DHCP addressing) File server—store files from your PC onto NetPlace
Intranet Applications Included	Family event calendar, recipe manager, address book, grocery list manager, car maintenance logs, personal inventory manager, gallery photo album, digital jukebox MP3 music player, network backup
