

KILLER APPLETS

UPB Home Automation Control

Chandelier Dimmer

BENEFITS

- **Convenience**—dim your chandelier without getting out of your favorite chair
- **Economic**—dim your chandelier to save money and extend bulb life
- **Comfort**—dimmed lights are warmer and more inviting
- **Easily installed using:**
 - 1 UPB dimmer (see sizing table)
 - 1 multi-button controller

From any location in the house, dim your chandelier for the perfect ambiance

YOUR CHANDELIER IS BEAUTIFUL but when it's burning at full strength it can be overwhelming. Dim it to any level from any location using UPB. Once you've included the chandelier in your lighting control system, you can incorporate it in any of your lighting scenes. For parties and dinners your dimmed chandelier can add warmth and texture.

A Chandelier normally draws a higher lighting load than any other lighting circuit in the house. Use the following sizing table to determine the right UPB dimmer for your chandelier.

WHAT IS A KILLER APPLETS?

"Killer App" is industry jargon for an application that persuades users to buy the system it runs on.

There is no single killer app for home control, but there are many Killer Applets — UPB-based applications that can satisfy your individual needs.

Take a look at our collection of Killer Applets and we think you'll agree: home automation using UPB is the right choice to enhance the safety, security, and comfort of your home.
