

KILLER APPLLET

UPB Home Automation Control

Peace-of-Mind Vacation Lighting

BENEFITS

- **Safety and Security**—house looks lived in while the homeowner is on vacation
- **Easily installed using:**
 - 2 Lamp modules
 - 1 Appliance module
 - 1 Computer interface module
 - Intelligent controller

You may be on vacation, but your home keeps on working. Make it look lived in while away!

YOU WORKED HARD to get where you are in life. Now it's time to treat yourself with that long awaited vacation. While you are away, protect your home effectively and easily with lighting controls.

Setup lamp modules to turn on lamps in the Master Bedroom or Den. Use an appliance module to turn on a radio. Use the timer function to program the lamps and radio to turn on at seemingly random times to make the house look lived in.

WHAT IS A KILLER APPLLET?

"Killer App" is industry jargon for an application that persuades users to buy the system it runs on.

There is no single killer app for home control, but there are many Killer Applets — UPB-based applications that can satisfy your individual needs.

Take a look at our collection of Killer Applets and we think you'll agree: home automation using UPB is the right choice to enhance the safety, security, and comfort of your home.

For immediate attention call: **720-207-9174**.

Make it appear that you are watching TV or listening to the radio at 7 PM. Maybe even turn a light on for added effect. Then, one by one, the lights and appliances go off, suggesting you are turning in for the night. The bad guys think you're at home, never suspecting that you and your wife are dancing the night away in some far off vacation spot!
