

KILLER APPLLET

UPB Home Automation Control

Theater Scene

BENEFITS

- **Comfort** — enhance your viewing experience by setting all lights to the most enjoyable levels
- **Convenience** — turn lights on and off from your couch or favorite viewing location
- **Savings**—easily turn off all unused lights in the house when enjoying TV or a movie
- **Easily installed using:**
 - 1 Desktop controller
 - Wall dimmers
 - Various other UPB modules (optional)

WHAT IS A KILLER APPLLET?

"Killer App" is industry jargon for an application that persuades users to buy the system it runs on.

There is no single killer app for home control, but there are many Killer Applets — UPB-based applications that can satisfy your individual needs.

Take a look at our collection of Killer Applets and we think you'll agree: home automation using UPB is the right choice to enhance the safety, security, and comfort of your home.

For UPB product information email us at: info@webmtn.com.

Set all your lights for optimal TV or movie viewing.

WHEN IT'S TIME TO ENJOY a movie or your favorite TV show, enhance the experience by setting every light in the house to just the right intensity. Turn off all the lights that you don't need and set the others for the most pleasant experience. Experiment with your lighting until you get just the right settings, then commit those settings to a UPB link to create a repeatable scene. Customize different scene settings for different viewers—UPB allows you to include every light in up to 16 different scenes.

7:30 pm

7:35 pm

Use a desktop controller beside the couch to select your Theater Scene. The same controller can control a variety of other scenes, all from the comfort of your favorite armchair.
